EDUCATION

Bachelor of Engineering, CSE (Artificial Intelligence and Machine Learning) June 2026
9.0 CGPA, Muffakham Jah College of Engineering and Technology (Osmania University) | Hyderabad, India

High School (Maths, Biology, Physics, Chemistry) Mar 2022
AMS P. Obul Reddy Public School | Hyderabad, India

TECHNICAL SKILLS

Programming Languages:	Python, Javascript, Java, C, HTML, CSS
Web Development:	Node.js, Express, AJAX, Flask, React.js, Next.js, EJS, Responsive Design
Frameworks / Libraries:	Pytorch, Tensorflow, Keras, Pandas, Numpy, Matplotlib, Pyttsx3, BeautifulSoup
Developer Tools:	Git, PowerBI, Adobe After Effects, Adobe Premiere Pro, Microsoft Office

WORK EXPERIENCE

AI Developer | Linkiat | Remote (Riyadh, KSA) July 2026 – Present
- Developing AI agents, RAG applications, and full-stack solutions, including workflow automation and backend API integrations.

Software Engineer | Creative Analytica | Remote (United Arab Emirates) May 2025 – Present
- Leading the end-to-end development of a custom **property management system**, AqaarPro, including system architecture, database design, and full-stack implementation.
- Designing and developing four user modules (Manager, Owner, Tenant, Vendor) with distinct workflows and implementing robust features using React, Node.js, Express, Supabase, and PostgreSQL.

Machine Learning Engineer Intern | Artmac Soft | Hyderabad, India Oct 2024 - Feb 2025
- Designed a data augmentation pipeline with OpenCV and Pillow (~20,000 images) and optimized MobileNetV2 in PyTorch, improving accuracy to 88.35% through augmentation and architectural adjustments.
- Fine-tuned hyperparameters with learning rate schedulers to boost model performance and training efficiency.

PROJECTS

KnowMyDocs - AI Document Chat and RAG Tool
- Developed an AI tool for students, researchers, and professionals to upload, chat, and interact with documents for instant answers and summaries using React.js, Node.js and Supabase.
- Implemented intelligent, context-preserving chunking for RAG workflows, significantly boosting vector embedding accuracy and retrieval performance.

InterviewAIde - AI Interview Assistant Portal [GitHub]
- Built an AI interview-prep tool with adaptive simulations using the llama3-70b model for dynamic question and answering.
- Implemented using a Flask backend and JavaScript frontend with Web Speech API integration for verbal simulation.

Academic Management Portal [GitHub]
- Developed a role-based academic management app with dashboards for students, lecturers, and admins.
- Built using Node.js, Express.js, EJS, and MongoDB with real-time attendance, grading, and performance analytics.

The Gesture Glove [GitHub]
- Co-developed a hardware glove converting sign language gestures into speech and text for enhanced communication.
- Led serial communication to integrate MPU6050 and flex sensors with Arduino for real-time gesture recognition.

Legal Document Summarizer [GitHub]
- Developed a **Flask**-based web app for summarizing lengthy legal documents with multilingual translation support.
- Integrated Legal-Pegasus (HuggingFace) for summarization within a seamless Flask-based interface.

LEADERSHIP AND ACHIEVEMENTS

Engineering Lead | IEEE CIS MJCET

Web Developer | IEEE PES MJCET Aug 2023 - July 2024
- Developed the official website while overseeing a team of 20+ members in organizing hands-on workshops.

R&D Team Member | IEEE SMC MJCET Apr 2024 - Aug 2024
- Conducting research and development in LLMs and NLP, contributing to innovative AI-driven projects.

Departmental Award for Academic Excellence (2023, 2024, 2025) – Awarded for being in the top 5% of the batch.
